REMARKS                     

25X1

1. According to a directive of the Soviet Zone Directorate General, Railways, Materials and Tools Division, dated 14 June 1950, an inventory and inspection of all tools and materials stored in the Cottbus railroad district will be conducted by SOC control organs. The authorized railroad headquarters made all the necessary preparations but the Soviet control commission had not made the inspection by 20 June 1950. \*

25X1

- \*                      The measure is possibly connected with the much propagandized mobilization of inner reserves. The purpose of this mobilization is the immediate utilization of unused stocks or reserves in order to ease the present acute shortage of equipment and raw materials. Similar checks by Soviet control organs have not yet been reported from other railroad districts.
